Roy Syed, Sr. Software Engineer  
Cantor Fitzgerald  
498 Park Avenue  
New York, NY

Dear Mr. Roy:

I would like to express my desire for the Software Engineer Developer position at Clearcloud technologies. Currently I am pursuing my master's in computer science and I take great pride in learning about computer science. My career in Computer Science has always been about software and programming. Throughout high school and university, I have had my nose in a computer monitor and my hand on a keyboard, and I have always worked towards making software. My career goals will include programming, designing and implementing new projects for clients, and maintaining current systems.

I enjoy problem solving and learning about different programs and techniques to keep myself current with my field of study. Because of my interest in developing new applications, I am looking to take on a greater level of responsibility as I move up the ladder. I look forward to working with a team, leading a group and improving upon what was already designed.

I am very knowledgeable in both the web design and application design and implementation. I enjoy coding with both Microsoft Visual Studio and the Adobe Creative Suite. I have experience with WordPress, Magento, Drupal and Expression Engine, and have had the opportunity to work on a number of projects using these content management systems. My knowledge of programming languages includes the PHP, Python and C# programming languages and I have experience programming in SQL, R and Oracle databases.

My passion for software development is what I am looking for in a position, and I have demonstrated this through a number of projects. I am very confident in my ability to work on any design or project. I have worked on sites, applications and projects from design to completion. I have the ability to work on any type of project from start to finish and have had the experience of designing and implementing the back end and front end with all the appropriate programming and coding.

Thank you for your attention and time. I'm excited to learn more about your company's Software section. I feel that my education and college experience qualify me for this role. I am excited to improve my abilities as a software engineer in order to provide my all for this role. I would like to meet you in person and have a conversation exhibit my skills further. I am looking forward to hearing from you via phone 4757660876 or email mandalarevanth11@gmail.com

Sincerely,

Revanth Mandala
